

His-Ability Hope for Children with Disabilities

In Africa, a child born with a disability is at an extreme disadvantage, as most families don't have the means to properly care for the child's special needs.

At ECM we have chosen to focus on **God's ability** to restore hope in the lives of these children, and not on their disability.

It is our aim to improve quality of life by covering the cost of surgeries and other medical expenses, and providing medical equipment such as wheelchairs or walkers, physical therapy, and respite care for parents. We will educate families and communities regarding disabilities and how the needs of the children can be met.

Our goal is to raise **\$22,000** in 2019-20 to care for the needs of at least 40 children with disabilities.

Children like Opio, with cerebral palsy, need your help today. Though he is 26 years old, his mother must constantly care for him.
